## Pregelatinized Starch Market 2023 : Industry Survey, Growth, Competitive Landscape and Forecasts to 2023

The pregelatinized starch market is experiencing steady growth, driven by its versatile applications across various industries. Widely used as a thickening, binding, and stabilizing agent, it finds significant demand in food and beverage, pharmaceutical, and paper industries. Its ease of use and functional benefits make it a preferred ingredient in processed foods, tablets, and adhesives. Increasing consumer preference for convenience and clean-label products continues to fuel innovation and demand in this expanding market.

## MARKET FORECAST

- **Growing Demand in Food and Beverage Applications:** The pregelatinized starch market is poised for growth as manufacturers increasingly use it in processed foods, bakery products, and snacks due to its thickening, binding, and stabilizing properties. Rising consumer demand for convenience foods further supports this trend.
- **Expansion in Pharmaceutical and Industrial Uses:** Its role as a disintegrant in pharmaceuticals and a binding agent in industrial applications is driving market expansion, with increasing adoption across these sectors.
